

# **Emech® Three-Way Temperature Control Valve**

Water to Water Mixing - E100WR

### **Emech® Three-Way Temperature Control Valve**

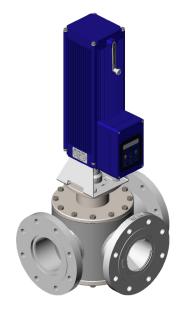

Emech® Three-Way Temperature Control Valve provides temperature control accuracy to  $\pm$  2°F (1°C) over a 32°F - 212°F (0°C - 100°C) control range, capable of blending from 0% to 100% of either inlet temperature.

The electronic actuator and temperature sensor deliver high-performance, stand-alone, closed-loop control. Emech® utilizes rotary turret control geometry to provide high-performance dynamic fluid mixing.

Even with sudden changes to inlet pressures and temperatures, the actuator aggressively responds to minimize outlet temperature variations, making the system ideal for use in a variety of applications as a simple standalone mixing valve, or as an integrated mixing solution.

### **General Features**

- · Any two ports can be configured as inlet ports
- · Non-water applications supported (e.g. glycol, hydraulic fluid)
- Top entry to valve allows inline access to internal parts
- 90° stroke time as low as 1.5 seconds for fast control action
- Precise positioning achieving 0.03° valve seat placement
- Keypad display for full actuator configuration without external devices required
- Local closed-loop temperature control
- · Failsafe position feedback (non-contact absolute encoder)
- · Manual override with electrical safety interlock
- 100% duty cycle rated for continuous control
- Electronic stroke setting (up to 355° rotation)

E100WR

Material and Design	Specifications				
Valve Body					
Internal Components	Stainless Steel CF8M (Type 316)				
Seal Material	Elastomer				
Actuator Mounting	ISO 5211, 5210				
End Connection	4" ASME 816.5 Class 150 Flange				
Enclosure	NEMA 4X				

Technical Specifications							
Operating Temperature	-13° - 257°F (-25°C - 125°C)						
Operating Pressure	232 psi (16 bar)						
Leakage Class	Class IV FCI 70-2-1998 (< 0.01% capacity)						
Design	ASME B16.34						
Operating Mode	Standalone control via onboard keypad Analog (4-20mA input and output) Modbus (RS-485 port)						

Flow Capacity - gpm (lpm)													
	Port Connection Sizes Inlets x Outlets	Pressure Drop - psi (bar)								Nominal	C		
Model		5 (0.3)	10 (0.7)	15 (1.0)	20 (1.4)	25 (1.7)	30 (2.1)	35 (2.4)	40 (2.8)	45 (3.1)	50 (3.4)	Min. Flow* gpm (lpm)	$(K_{\nu})$
E100WR	4" x 4" ASME B16.5 Class 150 Flanges	736 (2,785)	1,040 (3,938)	1,274 (4,823)	1,471 (5,570)	1,645 (6,227)	1,802 (6,821)	1,946 (7,368)	2,081 (7,877)	2,207 (8,354)	2,326 (8,806)	160.0 (605.7)	329.0 (284.3)

<sup>\*</sup>The nominal recommended minimum flow is desiribed as the minimum flow at which temperature control can be readily achieved for the given valve size with the actuator set at a STANDARD control gain setting. Contact the factory for applications where flow conditions are lower than those stated above.

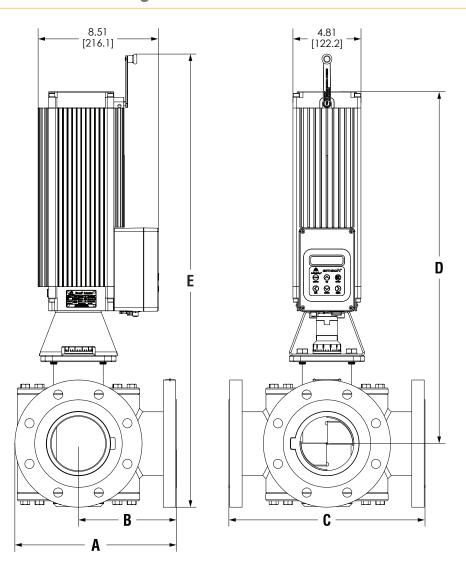

See FLOW CAPACITIES note at the end of this document.

## **Emech® Three-Way Temperature Control Valve**

Water to Water Mixing - E100WR

Dimensions - Flanged E100WR

Dimensi	ons					
Model	Α	В	С	D	E	
Model	in (mm)	in (mm)	in (mm)	in (mm)	in (mm)	
E100WR	11.38 (289.1)	6.94 (176.3)	13.76 (349.6)	24.88 (632.0)	32.06 (814.3)	

	Shipping Weights and Shipping Box Size							
	Model	Length	Width	Height	Product Weight	Ship Weight		
		in (mm)	in (mm)	in (mm)	lbs (kg)	lbs (kg)		
	E100WR	32.75 (831.9)	16.00 (406.4)	20.00 (508.0)	173 (78.5)	202 (91.6)		

#### IMPORTANT NOTES:

- Check valves MUST be installed on both inlets to the mixing system.
- · Contact Armstrong or visit armstronginternational.com for Emech® valve sizing program and application notes.
- NTC temperature probe assembly must be fitted into pipework 15.75" (400mm) downstream of the outlet port (fits into 1/2" NPT female thread).
- Ensure that straight pipes to the valve are as long as possible. Elbows prior to the inlet should be long 'sweep style' and no closer than 6 pipe diameters from the inlet.

### FLOW CAPACITIES:

- Sensible pipeline velocities are the only limit to the Emech® Water to Water mixing valve flows.

Further information on installation requirements and recommendations are available in the G2 Manual (IOM-458).
