Armstrong Duralite[®] Plate Fin Coils

Armstrong is a full-line coil supplier with application knowledge and experience you'll find nowhere else in the industry. For nearly half a century, our heavy-duty industrial coils have been serving the process needs of heavy industry. Building on that tradition of quality and dependability, our plate fin coils meet the diverse needs of the HVAC and light industrial markets.

Casings

14 or 16 Ga galvanized steel, depending on size and material Options: aluminum or stainless steel

Casing holes Drawn to minimize tube wear

Vent connections Top and bottom on all liquid coils, top of condensate header on Standard steam coils

Fins

V-waffle, HTE or flat: 6 to 14 FPI Aluminum: .008", .010", .012" thick Copper: .006", .009" thick

Connections

Brass MPT for cooling applications, steel for heating applications Options: brass or steel flanged

Tubes 5/8" OD x .028" thick copper

Options: .020" or .035" or .049" copper

1" OD x .032" thick copper on One-Row steam coils Option: .049" thick copper

5/8" OD x 0.049" copper nickel

Headers

Minimum .060" to .134" thick copper or copper nickel, depending on coil size

Plate Fin Coil Model Numbers

How to Identify the Circuiting

of a Return Bend Coil

- 1. Identify the inlet header and count the number of tubes fed from it.
- 2. Count the number of tubes in the face of the coil.
- 3. Divide the number of tubes fed from the header by the number of tubes in the face.
- 4. The result is the identification of the coil's circuit.

How to Identify the Hand of a Return Bend Coil

- 1. Face the coil with the airflow at your back (or imagine this).
- 2. Point to the outlet connection (it will be at the top of a liquid coil and should be closest to you). On a return bend steam coil, it will be the condensate return connection and should be farthest from you. If the reverse of the above exists, the coil may be installed incorrectly.
- 3. The connection on your right indicates a right-hand coil.
- 4. The connection on your left indicates a left-hand coil.

Coil-A-ware Sizing Program

Armstrong coils, both heavy duty and plate fin, are available on a Windows*-based computer program that is extremely user friendly. To obtain a copy through your Armstrong Representative, visit our Web site at armstronginternational. com and supply the requested information. Your local representative will personally deliver it to you. Updates will be available and downloadable from the Web site.

How To Order Armstrong Duralite[®] Plate Fin Steam Coils

Armstrong Duralite[®] Plate Fin Steam Coils are available in Centifeed (Steam Distributing Tube Type), Standard (Opposite End Connections) and Two-Row Return Bend Construction.

Centifeed, Standard and Return Bend coils are made of 5/8" OD tubes as a standard.

One-Row coils are available optionally with 1" OD tubes.

Depending upon steam flow, long Centifeed coils may require steam to be fed from both ends to eliminate cold tube ends and subsequent freezing potential.

To ensure that a replacement coil will fit in the same location, and that it will perform the same as the coil it replaces, the dimensions and other data requested below must be obtained prior to sizing and pricing.

Dimensions

How To Order Armstrong Duralite[®] Plate Fin Liquid Coils

Armstrong Duralite[™] Plate Fin Heating Coils are available in Return Header design in one- or two-row configurations and Return Bend design in two or more rows. Liquid coils are made of 5/8" OD copper tube.

Cooling coils can be built from 2 to 12 rows and with double, full or 1/2 circuits. Custom circuits are also available.

To ensure that a replacement coil will fit in the same location, and that it will perform the same as the coil it replaces, the dimensions and other data requested below must be obtained prior to sizing and pricing.
