

Model 2033P-FMCD

STEAMIX 203 Steam/Water Mixing Valve of brass/stainless steel (SS) construction.

STEAMIX® Model 2033P is supplied with integral inlet supply risers comprising of 3/4" Y-type strainers, 3/4" ball valves, and a stainless steel bridge piece with lever for simultaneous on/off control of both inlet supplies. Fully assembled with a stainless steel hose rack and pressure-tested. Stainless steel dual scale top mount thermometer and inlet check valves included.

STEAMIX 2033P includes 25 feet of "safety yellow" washdown hose, low-heat-transfer polymer spray nozzle with trigger guard, swivel adapter, and a stainless steel nozzle hook.

STEAMIX Model 2033P-FMCD includes Type-304 stainless steel two-door cabinet with a 2" (50 mm) flange designed for recessed installation. The cabinet doors have a recessed "toggle" handle. All exposed surfaces have a #4 brushed finish. The bottom panel is crosscut to drain accidental water discharge within the cabinet.

Safety Features

- **Steamix 203SS will not pass live steam.** In the event of a complete failure of the inlet cold-water supply, or a reduction in cold-water pressure to below 20 (+/-5) psi (1.4 bar), STEAMIX will safely respond with a complete shutdown of outlet flow.
- In the event of an unlikely structural failure of the diaphragm (primary operating component), STEAMIX will "fail safe" to cold water.
- To prevent over-temperature selection by the user and the potential for overheated water and flash steam presentation common with other types of hose stations, STEAMIX is supplied with a single-temperature locking set.

Technical Specifications

- 3/4" (20 mm) NPT inlets/outlet(s)
- Brass/stainless steel construction
- Operating pressures
 - Maximum: 150 psi (10 bar)
 - Minimum: 20 psi† (1.4 bar)
- Maximum pressure loss ratio 10:1††
- Inlet check valves included
- Weight:
 - 138 lbs (63 kg) with 25 ft hose
 - 149 lbs (68 kg) with 50 ft hose

† **IMPORTANT NOTE: Lower steam pressures significantly reduce outlet flow rates.**

†† Ratio of inlet pressures accounting for restrictions on valve outlet (minus back pressure).

Flow Rates

The capacity charts indicate STEAMIX 203 flow rates at steam and water pressures commonly available in the average manufacturing plant. The STEAMIX 203 can handle a wide diversity of pressures and temperatures. Three typical outlet temperatures shown in the flow tables were selected to demonstrate the valve's flow rate at:

- A) "User safe" temperature (approx. 120°F - 48°C)
- B) "Hot hose down" temperature (approx. 150/160°F - 65/71°C)
- C) "Common bacteria kill" temperature (approx. 180°F - 82°C)

NOTE: All flow rates shown are with open outlet, and a reduction of flow is to be expected depending on the length and diameter of outlet pipework, washdown hose, spray nozzle, etc.

For a fully detailed approval drawing, refer to D644697 (2033P-25-FMCD) or D540820 (2033P-50-FMCD)
