## Model 2031—Premium

STEAMIX® Model 203 Steam/Water Mixing Valve of brass/stainless steel construction.

STEAMIX® Model 2031P is supplied as standard with integral inlet supply risers comprising $3 / 4^{\prime \prime} Y$-type strainers and $3 / 4^{\prime \prime}$ ball valves cross-linked by a stainless steel bridge piece and lever for simultaneous on/off control of both inlet supplies. The unit is supplied fully assembled and pressure-tested. Stainless Steel dual scale top mount Thermometer and Inlet Check Valves Included.

## Safety Features

- Steamix 203 will not pass live steam. In the event of either a

Locking set (included) complete failure of the inlet cold-water supply or a reduction in cold-water pressure to below 20 (+/-5) psi (1.4 bar), STEAMIX will respond with a complete shutdown of outlet flow.

- If there is a structural failure of the primary operating component (diaphragm), STEAMIX will "fail safe" to cold water.
- To prevent over-temperature selection by the user and the potential for overheated water and flash steam presentation common with other types of hose stations, STEAMIX is supplied with a single-temperature locking set.

## Technical Specifications

- 3/4" (20 mm) NPT inlets/outlet(s)
- Brass/stainless steel construction
- Operating pressures

Maximum: 150 psi (10 bar)
Minimum: 20 psi $\dagger$ (1.4 bar)

- Maximum pressure loss ratio 10:1††
- Inlet check valves included
- Weight: 40 lbs ( 18 kg )
$\dagger$ IMPORTANT NOTE: Lower steam pressures significantly reduce outlet flow rates.
$\dagger \dagger$ Ratio of inlet pressures accounting for restrictions on valve outlet (minus back pressure).

## Flow Rates

The capacity charts indicate STEAMIX 203 flow rates at steam and water pressures commonly available in the average manufacturing plant. The STEAMIX 203 can handle a wide diversity of pressures and temperatures. Three typical outlet temperatures shown in the flow tables were selected to demonstrate the valve's flow rate at:
A) "User safe" temperature (approx. $120^{\circ} \mathrm{F}-48^{\circ} \mathrm{C}$ )
B) "Hot hose down" temperature (approx. $150 / 160^{\circ} \mathrm{F}-65 / 71^{\circ} \mathrm{C}$ )
C) "Common bacteria kill" temperature (approx. $180^{\circ} \mathrm{F}-82^{\circ} \mathrm{C}$ )

NOTE: All flow rates shown are with open outlet, and a reduction of flow is to be expected depending on the length and diameter of outlet pipework, washdown hose, spray nozzle, etc.

## Model 2033—Premium

STEAMIX 203 Steam/Water Mixing Valve of brass/stainless steel (SS) construction.

STEAMIX® Model 2033P is supplied as standard with integral inlet supply risers comprising $3 / 4^{\prime \prime} Y$-type strainers and $3 / 4^{\prime \prime}$ ball valves cross-linked by a stainless steel bridge piece and lever for simultaneous on/off control of both inlet supplies. The unit is supplied fully assembled, pressure-tested and installed on a stainless steel hose rack. Stainless Steel dual scale top mount Thermometer and Inlet Check Valves included.

STEAMIX 2033P includes 25 feet of "safety yellow" washdown hose, low-heat-transfer polymer spray nozzle with trigger guard, swivel adapter, and a stainless steel nozzle hook.

Locking set (included)
