The Brain® Model DRV40 Digital Recirculation Valve Quick Start Guide

DRV40 IOM

Read this guide before starting up the DRV.

- Applicable codes must be followed and supersede any other instructions. Generally applicable codes in the US include: IPC (International Plumbing Code).
- Improper installation or operation may cause a flood resulting in property damage, personal injury, or death. Armstrong strongly recommends that a qualified installer perform DRV start-up.
- DRV service must be performed by a qualified individual.
- Improper installation, start-up, operation, maintenance, or service may void the warranty.
- **Hot water or metal may cause scald burns. Skin exposure to 140°F water or metal for only five seconds could cause a second-degree burn.**

Before using The Brain®, consult the full product manual by scanning the QR code or visiting <https://armstronginternational.com/products/the-brain-digital-recirculation-valve/>.

Mechanical Quick Start

Make sure that all operating conditions are within the specification limit located in the full product manual (see QR code or URL on cover).

1 Prepare the DRV to be installed by taking it out of the packaging and installing the appropriate inlet/outlet adapters, if required. Flush all pipework thoroughly. Close and secure the Electronics Module with the 2x4mm hexagon socket screws provided.

NOTE: Electronics Module must be closed for the DRV40 to operate.

2 Connect the DRV to the pipework, ensuring that check valves, strainers, and isolation valves are fitted as shown in the example illustrated below.

3

Make sure that each pipe is connected in the correct location in the system and in the proper orientation.

Electrical Quick Start

1

Plug the DRV into an approved circuit.

2

Turn power on and ensure the LED on the front cover cycles through the initial power up sequence.
