THE SUCCESS OF YOUR WATER SAFETY MANAGEMENT PLAN BEGINS HERE

From the company that introduced digital hot water control to the world comes a truly digital solution for safe, healthy domestic hot water from mechanical room to point of use.

Only Armstrong offers a digital solution designed specifically for a recirculating domestic hot water system. ArmadaSM combines the power of Armstrong's exhaustive knowledge and expertise with our industry-leading hot water technology, tools and software to address critical elements of your water safety management plan.

ONE SOLUTION OFFERS EVERYTHING YOU NEED

ArmadaSM helps you create a safe, comfortable, more enjoyable experience for your guests and staff.

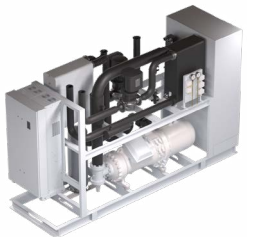

Whether it's a single product or a complete system, your custom ArmadaSM solution will include only what's appropriate for you. Our products are optimized for performance and designed to work in combination or individually, allowing us the flexibility to engineer every ArmadaSM solution to meet the hospitality industry's toughest requirements—as well as the unique needs of your hotel, resort or other facilities.

ArmadaSM for hospitality may include one or more of the following products, as well as other handworking products from our vast range of best-in-class hot water system solutions.

1

ARMSTRONG HEAT PUMP PACKAGES

Reclaim your wasted heat and put it to work where you need it most. Armstrong's custom heat pump packages provide a comprehensive, integrated solution that will carry you into the future.

2

ASCEND[®] ON-DEMAND GAS-FIRED WATER HEATERS WITH THE BRAIN[®] ON BOARD

Our high-efficiency, all-in-one solution comes ready to go, right out of the box—with no additional mixing valve required. With The Brain[®] on board, Ascend[®] provides the world's first fully integrated, single footprint, on-demand hot water generation and water temperature control solution compliant with ASSE 1017.

3

ARMSTRONG NANOBUBBLE GENERATOR

Cost-effective, sustainable, and proven to remove scale and inhibit new buildup for a healthier, more efficient hot water system with a longer lifespan.

4

THE BRAIN[®] DIGITAL RECIRCULATING VALVES

Armstrong's groundbreaking digital recirculating valve offers unparalleled accuracy, stability and safety by delivering hot water at a consistent, pre-set temperature to points of use. The Brain[®] features Bluetooth connectivity and works with BacNet systems.

5

SAGE[®] MONITORING, MEASURING AND REPORTING SOFTWARE

Keeps you informed 24/7 with regular updates and real-time alerts while ensuring a consistent supply of hot water at precision-controlled temperatures. Supports compliance with ASHRAE, OSHA, VA and more.
